Example of how to specify 3 Power Beams below.

To Daisy Chain Power:

- 1 Each Base In Feed
- 3 Each Power Blocks
- 2 Each Jumpers, 48"

Power Beam System with Daisy Chain Power

In single applications, the plug can be routed out the grommet in the end leg, and plugged directly into the wall.

In 2 or more beams in a row, internal power blocks, jumpers, and a base in feed are required to connect to the building power (*Building connection REQUIRED by an Electrician*), and the power panels are plugged into the power blocks inside the trough channel to power the external power panel.
