**To Daisy Chain Power:**

- 1 Each Base In Feed
- 3 Each Power Blocks
- 2 Each Jumpers, 48"

**Power Beam System with Daisy Chain Power**

In single applications, the plug can be routed out the grommet in the end leg, and plugged directly into the wall.

In 2 or more beams in a row, internal power blocks, jumpers, and a base in feed are required to connect to the building power (*Building connection REQUIRED by an Electrician*), and the power panels are plugged into the power blocks inside the trough channel to power the external power panel.
