

Operation Guide

1. Normal Operation

Drive the desk to the desired height when pressing and holding “↑” or “↓” button.

2. Setting the memory function

When the desk rises to the height which you want to memorize, please press and hold the “M” button till the display flashes and then press “1” button. Position 1 is now memorized. Repeat the above procedure for positions 2, 3 & 4. These four number buttons can memorize four different heights repeatedly. And those data won't be lost in case power is off.

3. System Initialization

If the system doesn't work normally when we use it, we need reset the system, to make the system be initialized.

Resetting procedure is as follows, press and hold on both “↑” and “↓” button together until the lifting column be lowest and you will hear a beep, and the display shows the number for lowest height, then whole step finishes.

Notice

- 1: This product must meet the actual technical parameters in use.
- 2: The system should be away from water and corrosion resistant gas.
